

Living Divani at Torre Velasca

Inaugurated last year for Expo 2015, the Living Divani Temporary Store's presence on the ground floor of Milan's Torre Velasca came to an end. With its four different settings of a dream home creating an important showcase for the company to present its refined products in one of the city's most picturesque and famous buildings, this elegant contemporary shelter designed by Piero Lissoni now makes way for a new presentation which will be inaugurated during the Fuorisalone. This will offer a new reinterpretation of the spaces of the famous building brought back to the centre of Milanese life, showing its multiple facets and endless modernity.

Continues the collaboration between the company and Unipol Group at Torre Velasca, which blossomed with Urban Up, a requalification project aimed at enhancing the value of some of the most important buildings owned by the group in Milan.

The presence of Living Divani is confirmed in a Penthouse at the 25th floor, where Piero Lissoni, together with leading Italian design brands, has created a space for exclusive events to experience the concept design driving the requalification of the entire residential area of Torre Velasca. Here numerous products from the Living Divani collection furnish the space in the pursuit of elegance, formal purity, and top quality details.
